ADVANCED BACK TECHNOLOGIES DEMONSTRATES EXTENTRAC® ELITE SPINAL DECOMPRESSION DEVICE AT PENNSYLVANIA CAPITOL

HAUPPAUGE, NEW YORK January 10, 2007 Healthcare & Hospitals News

(PRLEAP.COM) HAUPPAUGE, NY — Dr. David F. Cuccia, D.C., president of Advanced Back Technologies Inc. demonstrated the company's just-introduced ExtenTrac® Elite with M3D® Technology before members of the Pennsylvania Legislature and their staffs in the rotunda of the State Capitol in Harrisburg on Nov. 21.

The ExtenTrac® Elite is a patented, non-surgical device for the treatment of lower back pain and sciatica from herniated, bulging, and degenerative discs.

FDA 510(k) and UL registered, the ExtenTrac® Elite with its breakthrough Multi-Directional Disc Decompression technology represents the culmination of a collaborative effort between leading spine care specialists and cutting edge medical design engineers. It provides unprecedented treatment opportunities to address difficult back etiologies, including lower back pain from disc herniation, without surgery. Using the ExtenTrac® Elite, licensed health care professionals now can provide more effective non-surgical treatment over standard linear decompression devices by placing the spine in anatomically advantageous, pain-free postures during treatment. Unlike conventional decompression tables, which limit patient position to the horizontal axial position, ExtenTrac® Elite's M3D® system enables decompression from multiple directions utilizing manual controls or fully automated programmable cycles.

Dr. Cuccia, the inventor of the ExtenTrac® Elite Multi-Directional Spinal Decompression Device was invited to demonstrate the device by State Representative Roy E. Baldwin, who runs World of Wellness, a community organization in Lancaster, PA that targets obesity and disease prevention.

Founded in 1997 by Dr. David Cuccia, D.C., Advanced Back Technologies Inc. has its offices, design and manufacturing facility in Hauppauge, NY. For more information about the ExtenTrac® Elite visit www.extentrac.com or call 877-398-3687.
